The Sea-Doo XP was a model of personal watercraft produced by Bombardier Recreational Products from 1991 to 2004. The Sea-Doo XP is a significant model in that it was the first high performance version of a sit-down style watercraft to be offered by any manufacturer. Since the craft's introduction, all other personal watercraft manufacturers have introduced and continue to offer high ...

Sea-Doo XP - Wikipedia

1997 Sea-Doo XP 787 Storage When it comes time to put your four-stroke personal watercraft into seasonal storage, don ' t forget to stabilize the gas. Gasoline can break down in as little as 30 days and form varnish and sludge that clog fuel passages. Your engine then becomes difficult to start and runs poorly.

1997 Sea-Doo XP 787 (787) Motor Oil, Filters and ...

Annual sales for the Sea-Doo were over 100,000 units in the 1995 fiscal year, at which point the company had captured over half of the personal watercraft market. In 1997 the company earned \$212 million on the Sea-Doo.

From dirt bikes and jet skis to weed wackers and snowblowers, machines powered by small gas engines have become a permanent—and loud—fixture in American culture. But fifty years of high-speed fun and pristine lawns have not come without cost. In the first comprehensive history of the small-bore engine and the technology it powers, Paul R. Josephson explores the political, environmental, and public health issues surrounding one of America's most dangerous pastimes. Each chapter tells the story of an ecosystem within the United States and the devices that wreak havoc on it—personal watercraft (PWCs) on inland lakes and rivers; all-terrain vehicles (ATVs) in deserts and forests; lawn mowers and leaf blowers in suburbia. In addition to environmental impacts, Josephson discusses the development and promotion of these technologies, the legal and regulatory efforts made to improve their safety and environmental soundness, and the role of owners' clubs in encouraging responsible operation. Synthesizing information from medical journals, recent environmental research, nongovernmental organizations, and manufacturers, Josephson's compelling history leads to one irrefutable conclusion: these machines cannot be operated without loss of life and loss of habitat.
