Xserve (2009) - Technical Specifications - Apple Support

The Xserve (Early 2009) has no frontside bus, and as such there is no published bus speed. In its place, the Mac Pro uses Intel's QuickPath Interconnect system, a bi-directional, point-to-point connection system, which is functionally equivalent to a frontside bus operating at roughly 1:1 with the processor clock speed. An 8-core model with all slots and bays filled weighed 38.3 lbs.
