The Applied Mycology Group is an internationally recognised Centre of Excellence in specialised areas of the application of fungal technology in the food, environment and health sectors.

Applied Mycology Group - Cranfield A.Mycology

The Applied Mycology and Bacteriology Group has a broad range of interests and specialisms relating to the interaction of microorganisms and plants and their effects on crop production.

Applied Mycology and Bacteriology | AAB

Applied Mycology brings together a range of contributions, highlighting the diverse nature of current research.

Applied Mycology - CABL.org

A range of contributions are given to highlight the diverse nature of current applied mycology research. The opening chapter of this volume provides some examples of how mycology is often neglected, and presents a case for considering mycology as a megascience.

Applied mycology. - CABL.org

Journal of Basic and Applied Mycology is a peer-reviewed open access international journal that focuses on original and innovative basic and applied research studies, as well as learned reviews on all aspects of mycology. Journal [ISSN: 0972-7167 (P); 2455-3875 (O)] is published bi-annually by the Society for Basic and Applied Mycology (SBAM).

Journal of Basic & Applied Mycology

Applied Mycology and Learning Lab A not-for-profit organisation aimed at increasing community awareness about fungi and making scientific training, equipment and resources available to citizen mycologists. We're based out of the BioQuisitive laboratory in Melbourne, Australia. We also try to hold events in different areas around Victoria.

MYCOmmunity – Applied Mycology and Learning Lab

The Applied Food Mycology course offers a research led introduction to fungi, yeasts, the toxins they produce and the problems they can cause in foods. This includes both spoilage and health effects. It will present a balanced view of the importance of mycology in the context of the modern food industry.

Applied Food Mycology | AFTP

This book explores the developments in important aspects of fungi related to the environment, industrial mycology, microbiology, biotechnology, and agriculture. It discusses at length both basic and applied aspects of fungi and provides up-to-date laboratory-based data.
