This Book Is An Account Of How Dr. Kalam Visualizes Information And Communication Technology Mining The Rural Talent. Here, Dr. Kalam Present His Dream Of Schools In India At 2020 As Symbiotic Nerve Centres Connecting Teachers, Students And Community; Personifying Knowledge That Exists In The World. He Also Makes A Clarion Call To Accelerate The Process Of Societal Transformation. This Would Involve Raising The Standards Of Governance And Safeguarding The Sanctity Of Public Institutions. The Book Uses The Metaphor Of A Tree To Describe The Process Of Knowledge Bearing Fruits Of Prosperity In The Contemporary Globalised World Where Different Phases, Formative, Adult Working Life, And Post-50 Experienced Senior Citizens, Call For Different Kinds Of Learning. The Book Refers To A Contextual Contribution Of A Large Number Of Indian Scientists And Artists And Proves That There Is No Age Bar To Blossom. He Advocates Creation Of Conditions That Favour Growth Of Diverse Individual Talents Akin To Agarden And Calls For A Scientific Mind-Set Guided By Conscience, Consensus And By Actions That Take Our Social And Moral Values Into Account In Building Our Own Systems.

This book is an account of how Dr. Kalam visualizes Information and Communication Technology mining the rural talent. Here, Dr. Kalam presents his dream of schools in India at 2020 as symbiotic nerve centres connecting teachers, students and community; personifying knowledge that exists in the world. He also makes a clarion call to accelerate the process of societal transformation. This would involve raising the standards of governance and safeguarding the sanctity of public institutions. The book uses the metaphor of a tree to describe the process of knowledge bearing fruits of prosperity in the contemporary globalized world where different phases, formative, adult working life, and post-50 experienced senior citizens, call for different kinds of learning. The book refers to a contextual contribution of a large number of Indian scientists and artists and proves that there is no age bar to blossom. He advocates creation of conditions that favour growth of diverse individual talents akin to a garden and calls for a scientific mind-set guided by conscience, consensus and by actions that take our social and moral values into account in building our own systems.

Dr. A. P. J. Abdul Kalam had a great belief in the power of the youth. He met over 21 million children and young people in India and outside and spoke to them about the power of knowledge, ambition, moral behavior and the need to bring about change in society. He travelled to almost every corner of the country meeting the youth in schools, universities and institutions and interacted with them like a committed teacher. In Learning How to Fly some of his nearly 2, 000 lectures have been compiled. These lectures were addressed to teachers and students in school and beyond. In each one of them he has spoken about preparing oneself best for life, to identify and overcome challenges and how to bring out the best within each individual. Through stories from his own life, those of his teachers and mentors as well as stories of some of the greatest men and women of the world and the latest developments in science and technology, he shows us the importance of dreams and the hard work needed to turn those dreams into reality. Filled with warmth, inspiration and a positive attitude, Learning How to Fly is essential reading for every Indian, young and old.

The story of my life has become intertwined with the story of this country. And somewhere along the way, as I met a million children across this land, I too learnt from a million minds. This book was not written to only tell my story. I want every young reader to think that this book is his or her story too.' A.P.J. Abdul Kalam has been one of the most iconic figures of Independent India. A scientist, leader, thinker, teacher and writer, he achieved remarkable success in various fields. Yet, what endeared him to so many was his dedication to the idea of a developed India, his simple and direct way of interacting with people and his deep love for his fellowmen. In My Life, Kalam writes his life story starting from his days growing up at Rameswaram; about working on India's space and missile programmes; his years as the eleventh President of India; and about his life thereafter. Full of anecdotes that demonstrate the importance of hard work, commitment, courage and innovative thinking, this autobiography is a wonderful introduction to a remarkable life. Beautifully illustrated and simply written, My Life will inspire readers of all ages.

A book in memory of the country's most loved teacher. Dr Kalam is often remembered as a teacher par excellence, whose words, thoughts and very life were lessons in many ways. This book is dedicated by his student Srijan Pal Singh, who worked closely with him, right till the last day of his life. Recollecting his mentor's values, oaths and messages to the youth, Srijan beautifully shares the lessons Dr Kalam taught beyond the classroom. A peek into his daily routine, travels, reflections on various national and international issues, anecdotes and quips, this book helps readers get up-close and personal with the greatest Indian of contemporary times. Featuring many little-known stories and never-before-seen photographs, as well as certain expressions that were classic Dr Kalam, this heart-warming memoir will inspire and enlighten, immortalizing the words and actions of a beloved leader.

The first part deals with the concept of inner experience – thoughts, emotions, feelings, perception and knowledge among their things. In the second part, the essence of some great souls is presented – people who lived in different eras and who could offer to mankind a movement forward in the most selfless manner. In the Third and the concluding part the book describes the journey of the soul and its various manifestations as the unfolding of an eternal essence.

What is it that we as a nation are missing? Why, given all our skills, resources and talents, do we settle so often for the ordinary instead of striving to be the best? At the heart of Ignited Minds is an irresistible premise: that people do have the power, through hard work, to realize their dream of a truly good life. Kalam's vision document of aspiration and hope motivates us to unleash the dormant energy within India and guide the country to greatness.

It was like any other day on the Anna University campus in Chennai. As I was returning to my room in the evening, the vice-chancellor, Prof. A. Kalanidhi, fell in step with me. Someone had been frantically trying to get in touch with me through the day, he said. Indeed, the phone was ringing when I entered the room. When I answered, a voice at the other end said, 'The prime minister wants to talk with you.' Some months earlier, I had left my post as Principal Scientific Adviser to the Government of India to return to teaching. Now, as I spoke to the PM, Atal Bihari Vajpayee, my life was set for an unexpected change. Turning Points takes up the incredible Kalam story from where Wings of Fire left off. It brings together details from his career and presidency that are not generally known as he speaks out for the first time on certain points of controversy. It is a continuing saga, above all, of a journey - individual and collective - that will take India to 2020 and beyond as a developed nation.

Mission India: A Vision For Indian Youth has been written with the intention of challenging the Indian youth to bring about a positive change in the country by 2020. Kalam starts off by telling the readers that there has never been a time in Indian history such as this, where the nation has 540 million youth and 20 million Indians across the globe. He also states that several developed countries have directed their efforts towards setting up research centers across the country, which has benefited scientists, engineers, and professionals from various spheres. Kalam and Rajan tell the readers about their goal to make India one among the five top economic powers in the world by 2020. In the beginning of this book, Kalam presents the readers with a question as to whether India can become a developed country. He then provides insights into the current situation in the country, and explains that this goal is a realistic one. In the subsequent chapters, Kalam and Rajan begin to examine the five industries that need to become reasonably self-sufficient in the coming years, and each chapter tells the readers what can be done to bring a positive change in each industry. They also tell the readers about the current education system in the country, and the latest technology that can be used to improve the quality of education. The readers are also given insights into the present healthcare industry and infrastructural system, which are trademarks of a developed nation. Kalam and Rajan conclude by telling every individual and organization about the role they can play in transforming the nation by 2020
