The Board Review Series (BRS) is aimed at providing basic knowledge as it relates to clinical situations and is used primarily by medical students studying for the United States Medical Licensing Examinations (USMLE). BRS Behavioral Science, Fifth Edition covers material on this subject that is addressed on USMLE Step 1, written in outline format to provide an efficient method of studying behavioral science for USMLE. The book includes at least 500 USMLE-style questions with accompanying annotated answers. An exam follows each chapter and a Comprehensive Exam is included at the end of the book. A companion Website will offer the fully searchable text and an interactive question bank.

Designed primarily for medical and dental students preparing for the USMLE Step 1 and other examinations, this book presents the essentials of human neuroanatomy in a succinct outline format with abundant illustrations. Over 600 USMLE-style questions with complete answers and explanations are included, some at the end of each chapter and some in an end-of-book Comprehensive Examination. This edition uses color to delineate neuroanatomical pathways and highlight clinical correlations. New clinical MRI and MRA images have been added. Questions follow the clinical vignette-based format of the current USMLE. A companion Website on thePoint offers instant access to the complete, fully searchable text and all questions from the book.

This powerful, easy-to-use resource presents the essentials of pathology in the popular Board Review Series outline format that highlights the most tested topics for the USMLE Step 1. Packed with new content; high-yield topics; concise descriptions; more than 450 USMLE-style questions with complete answers and explanations; and full-color illustrations, photomicrographs, and radiologic images, BRS Pathology, Sixth Edition, provides everything needed for course success and board exam prep.

Renowned physiology instructor Dr. Linda Costanzo's friendly, logical, easy-to-follow writing style makes Physiology, 6th Edition ideal for coursework and USMLE preparation. Well-designed figures and tables provide handy visuals for procedures or physiologic equations, and step-by-step explanations clarify challenging concepts. This full-color, manageably-sized text offers a comprehensive and consistent overview of core physiologic concepts at the organ system and cellular levels, making complex principles easy to understand. Information is presented in a short, simple, and focused manner – the perfect presentation for success in coursework and on exams. Chapter summaries and "Challenge Yourself" questions at the end of each chapter provide an extensive review of the material and reinforce understanding and retention. Equations and sample problems are integrated throughout the text. NEW! More Clinical Physiology Case Boxes relate to pathophysiology for a clinical context

This powerful, easy-to-use resource presents the essentials of human anatomy in the popular Board Review Series outline format and includes concise descriptions, clinical correlations, radiographs, full-color illustrations, and tables. Considered the best review book for gross anatomy by medical student reviewers, this updated and streamlined ninth edition includes more than 550 board-style questions with complete answers and explanations, organized into chapter review tests and an end-of-book comprehensive exam, to help students master key information. Updated clinical correlations demonstrate connections between anatomical knowledge and clinical medicine. Numerous medical images help students develop a better understanding of anatomy and clinical medicine. More than 550 USMLE-style questions (many new to this edition) with answers and rationales are available both electronically and in print to facilitate review. An updated art program with more than 200 color illustrations helps students understand difficult concepts and complicated anatomical structures. High-yield reviews at the end of each chapter provide targeted preparation for board and anatomy course examinations.
