Built to Sell » MustReadSummaries.com - Learn from the best

A business parable about how to create a start-up that won't trap you when you want to sell it. According to John Warrillow, the number one mistake entrepreneurs make is to build a business that relies too heavily on them. Thus, when the time comes to sell, buyers aren't confident that the company—even if it's profitable—can stand on its own.

Create your plan/blueprint: Remember that you are not designing your dream home. You are designing a home to sell quickly. Your home must appeal to the masses, not to a niche. Find out which homes in the area are selling the best—bedroom counts, kitchen design, and master bedroom / bathroom design.

How to Build a House for Profit | Bizfluent

Learn more about becoming a Built to Sell Coach. Seventy six percent of owners plan to exit their business in the next ten years and many will turn to an advisor for help. Today's most relevant coaching credential is called the Certified Value Builder®, where you learn to help your clients apply the Built to Sell philosophy to their business.

Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

According to John Warrillow, the number one mistake entrepreneurs make is to build a business that relies too heavily on them. Thus, when the time comes to sell, buyers aren't confident that the company—even if it's profitable—can stand on its own. To illustrate this, Warrillow introduces us to a fictional small business owner named Alex who is struggling to sell his advertising agency. Alex turns to Ted, an entrepreneur and old family friend, who encourages Alex to pursue three criteria to make his business sellable: * Teachable: focus on products and services that you can teach employees to deliver. * Valuable: avoid price wars by specializing in doing one thing better than anyone else. * Repeatable: generate recurring revenue by engineering products that customers have to repurchase often.

Run your company. Don't let it run you. Most business owners started their company because they wanted more freedom—to work on their own schedules, make the kind of money they deserve, and eventually retire on the fruits of their labor. Unfortunately, according to John Warrillow, most owners find that stepping out of the picture is extremely difficult because their business relies too heavily on their personal involvement. Without them, their company—no matter how big or profitable—is essentially worthless. But the good news is that entrepreneurs can take specific steps—no matter what stage a business is in—to create a valuable, sellable company. Warrillow shows exactly what it takes to create a solid business that can thrive long into the future.

Freedom. It's the ability to do whatever you want, whenever you want. It's the ultimate reward of selling your business. But selling a company can be confusing, and one wrong step can easily cost you dearly. The Art of Selling Your Business: Winning Strategies & Secret Hacks for Exiting on Top is the last in a trilogy of books by author John Warrillow on building value. The first, Built to Sell, encouraged small business owners to begin thinking about their business as more than just a job. The Automatic Customer tagged recurring revenue as the core element in a valuable company and provided a blueprint for transforming almost any business into one with an ongoing annuity stream. Warrillow completes the set with The Art of Selling Your Business. This essential guide to monetizing a business is based on interviews the author conducted on his podcast, Built to Sell Radio, with hundreds of successfully cashed-out founders. What's the secret for harvesting the value you've created when it's time to sell? The Art of Selling Your Business answers important questions facing any founder, including: • What's your business worth? • When's the best time to sell? • How do you create a bidding war? • How can you position your company to maximize its attractiveness? • Who will pay the most for your business? • What's the secret for punching above your weight in a negotiation to sell your company? The Art of Selling Your Business provides a sleeves-rolled-up action plan for selling your business at a premium by an author with consummate credibility.

The lifeblood of your business is repeat customers. But customers can be fickle, markets shift, and competitors are ruthless. So how do you ensure a steady flow of repeat business? The secret—no matter what industry you're in—is finding and keeping automatic customers. These days virtually anything you need can be purchased through a subscription, with more convenience than ever before. Far beyond Spotify, Netflix, and New York Times subscriptions, you can sign up for weekly or monthly supplies of everything from groceries (AmazonFresh) to cosmetics (Birchbox) to razor blades (Dollar Shave Club). According to John Warrillow, this emerging subscription economy offers huge opportunities to companies that know how to turn customers into subscribers. Automatic customers are the key to increasing cash flow, igniting growth, and boosting the value of your company. Consider Whatsapp, the internet-based messaging service that was purchased by Facebook for \$19 billion. While other services bombarded users with invasive ads in order to fund a free messaging platform, Whatsapp offered a refreshingly private tool on a subscription platform, charging just \$1 per year. Their business model enabled the kind of service that customers wanted and ensured automatic customers for years to come. As Warrillow shows, subscriptions aren't limited to technology or media businesses. Companies in nearly any industry, from start-ups to the Fortune 500, from home contractors to florists, can build subscriptions into their business. Warrillow provides the essential blueprint for winning automatic customers with one of the nine subscription business models, including: • The Membership Website Model: Companies like The Wood Whisperer Guild, ContractorSelling, and DanceStudioOwner offer access to highly specialized, high quality information, recognizing that people will pay for good content. This model can work for any business with a tightly defined niche market and insider information. • The Simplifier Model: Companies like Mosquito Squad (pest control) and Hassle Free Homes (home maintenance) take a recurring task off your to-do list. Any business serving busy consumers can adopt this model not only to create a recurring revenue stream, but also to take advantage of the opportunity to cross-sell or bundle their services. • The Surprise Box Model: Companies like BarkBox (dog treats) and Standard Cocoa (craft chocolate) send their subscribers curated packages of goodies each month. If you can handle the logistics of shipping, giving customers joy in something new can translate to sales on your larger e-commerce site. This book also shows you how to master the psychology of selling subscriptions and how to reduce churn and provides a road map for the essential statistics you need to measure the health of your subscription business. Whether you want to transform your entire business into a recurring revenue engine or just pick up an extra 5 percent of sales growth, The Automatic Customer will be your secret weapon.

From the Publisher: America's 27 million business owners want to build sellable companies so that they can retire, travel, cash out, or just sleep well at night knowing they could sell. Unfortunately, just 1 out of 100 business owners are successful in selling their company each year because too many have built unsellable companies. Readers of Built To Sell will learn: -The 8 steps to creating a sellable company -How to attract multiple strategic bidders for their business -How to maximize their valuation and get the highest possible price for their business -The secret to getting their cash up front and avoiding a lengthy earn out Described by one reader as "John Grisham meets Jim Collins", John Warrillow's new book provides business owners with a blueprint for creating a sellable company.

MBA MEETS MAIN STREET Finally, the positive economic news every businessperson is waiting to hear. Jack Garson says the long economic downturn will give way to a major buying spree by cash-rich companies—and they could be in the market to purchase your small or medium-sized business. It's the ultimate payday for everyone who wants to live the American dream, whether they're starting a business or already own one. Millions of dollars are on the table. But will you and your business be ready? How to Build a Business and Sell it for Millions is a must-read for every business owner and would-be entrepreneur. In entertaining and elaborate detail, Garson outlines the vital moves your company needs to make to become an attractive acquisition by other firms: • Do you have a competitive edge that sets you apart from your competition? • Are both you and your company sustainable and able to outlast the bad times to become a success? • Can you stop being a "Derek," the boss who suffers from "Founder's Dilemma," micromanaging everything big and small? How to Build a Business and Sell it for Millions uses real life examples to explain how the goal of selling your company needs to be linked to every business decision you make: hiring, compensation, contracts, financial reporting and dozens of other areas often overlooked by busy entrepreneurs. While many business owners struggle to get to the next day, Garson has the inside scoop on achieving the opportunity of a lifetime—selling your company for vast riches. In How to Build a Business and Sell It for Millions, MBA meets Main Street, with a combination of inspiration and invaluable practical advice.

"This is not a book about charismatic visionary leaders. It is not about visionary product concepts or visionary products or visionary market insights. Nor is it about just having a corporate vision. This is a book about something far more important, enduring, and substantial. This is a book about visionary companies." So write Jim Collins and Jerry Porras in this groundbreaking book that shatters myths, provides new insights, and gives practical guidance to those who would like to build landmark companies that stand the test of time. Drawing upon a six-year research project at the Stanford University Graduate School of Business, Collins and Porras took eighteen truly exceptional and long-lasting companies -- they have an average age of nearly one hundred years and have outperformed the general stock market by a factor of fifteen since 1926 -- and studied each company in direct comparison to one of its top competitors. They examined the companies from their very beginnings to the present day -- as start-ups, as midsize companies, and as large corporations. Throughout, the authors asked: "What makes the truly exceptional companies different from other companies?" What separates General Electric, 3M, Merck, Wal-Mart, Hewlett-Packard, Walt Disney, and Philip Morris from their rivals? How, for example, did Procter & Gamble, which began life substantially behind rival Colgate, eventually prevail as the premier institution in its industry? How was Motorola able to move from a humble battery repair business into integrated circuits and cellular communications, while Zenith never became dominant in anything other than TVs? How did Boeing unseat McDonnell Douglas as the world's best commercial aircraft company -- what did Boeing have that McDonnell Douglas lacked? By answering such questions, Collins and Porras go beyond the incessant barrage of management buzzwords and fads of the day to discover timeless qualities that have consistently distinguished out-standing companies. They also provide inspiration to all executives and entrepreneurs by destroying the false but widely accepted idea that only charismatic visionary leaders can build visionary companies. Filled with hundreds of specific examples and organized into a coherent framework of practical concepts that can be applied by managers and entrepreneurs at all levels, Built to Last provides a master blueprint for building organizations that will prosper long into the twenty-first century and beyond.

Many of the areas that salespeople struggle with these days have long been the domain of marketers, according to bestselling author John Jantsch. The traditional business model dictates that marketers own the message while sellers own the relationships. But now, Jantsch flips the usual sales approach on its head. It's no longer enough to view a salesperson's job as closing. Today's superstars must attract, teach, convert, serve, and measure while developing a personal brand that stands for trust and expertise. In Duct Tape Selling, Jantsch shows how to tackle a changing sales environment, whether you're an individual or charged with leading a sales team. You will learn to think like a marketer as you: Create an expert platform Become an authority in your field Mine networks to create critical relationships within your company and among your clients Build and utilize your Sales Hourglass Finish the sale and stay connected Make referrals an automatic part of your process As Jantsch writes: "Most people already know that the days of knocking on doors and hard-selling are over. But as I travel around the world speaking to groups of business owners, marketers, and sales professionals, the number one question I'm asked is, "What do we do now?" I've written this book specifically to answer that question. At the heart of it, marketing and sales have become activities that no longer simply support each other so much as feed off of each other's activity. Sales professionals must think and act like marketers in order to completely reframe their role in the mind of the customer."

Unearth the lucrative opportunities of the small business market The new entrepreneurial explosion has many Fortune 500 companies pinning their hopes for prosperity on the small business sector. But most blue chip behemoths simply don't know how to reach small businesses-they don't understand this segment's diversity and how to effectively reach out to its various parts. Drilling for Gold will show the big companies just how small businesses tick. John Warrillow reveals the enormous size of the small business marketing opportunity and shows readers various ways to reach this vast, yet seemingly hidden sector. He covers how to address the small business market, managing cost control, and segmenting the customer base, along with numerous case studies.
