rehabilitation is more effective than standard care or an attention control.

Cognitive rehabilitation for spatial neglect following ...

The effectiveness of cognitive rehabilitation interventions for reducing the disabling effects of neglect and increasing independence remains unproven. As a consequence, no rehabilitation approach can be supported or refuted based on current evidence from RCTs. However, there is some very limited evidence that cognitive rehabilitation may have an immediate beneficial effect on tests of neglect.

Cognitive rehabilitation for spatial neglect following ...

1.4.7 Assess attention and cognitive functions in people after stroke using standardised assessments. Use behavioural observation to evaluate the impact of the impairment on functional tasks. 1.4.8 Consider attention training for people with attention deficits after stroke.
