Homicide cop Troy Bennett had a reputation with the Chicago PD for being fearless and in control—until the night his daredevil partner is killed during a raid. From that moment on, he swears he'll never again be responsible for the loss of a loved one. To escape his demons, Troy transfers to the NYPD, bringing him up close and personal with Ruby Elliott, a beautiful, street-savvy pool hustler. Reckless and stubbornly independent, Ruby embodies everything Troy's avoiding, but when she walks into the pub he's at with his new coworkers and blows his carefully laid plans to hell, Troy knows he has to have her—risks be damned. But there's a connection between Ruby's shadowed past and a case Troy's working involving a notorious Brooklyn felon, throwing her safety into jeopardy. Confronted with his biggest fear, will Troy push Ruby away to keep her safe or fight to keep her in his arms where she belongs? An exciting prequel to the new Crossing the Line series! Each book in the Crossing the Lines series is a standalone, full-length story that can be enjoyed out of order. Series Order: Prequel Novella: His Risk to Take Book .5: Riskier Business Book 1: Risking it All Book 2: Up In Smoke Book 3: Boiling Point Book 4: Raw Redemption

This text introduces engineering students to probability theory and stochastic processes. Along with thorough mathematical development of the subject, the book presents intuitive explanations of key points in order to give students the insights they need to apply math to practical engineering problems. The first seven chapters contain the core material that is essential to any introductory course. In one-semester undergraduate courses, instructors can select material from the remaining chapters to meet their individual goals. Graduate courses can cover all chapters in one semester.

A vivid and elegant account of a family's season abroad by one of our finest contemporary authors Casting off a northern winter and an orderly life, a family decides to sell everything and go to Italy to search for art and its meanings, for freedom from routine, for a different path into the future. The award-winning writer Rachel Cusk describes a three-month journey around the Italy of Raphael and rented villas, of the Piero della Francesca trail and the tourist furnace of Amalfi, of soccer and the simple glories of pasta and gelato. With her husband and two children, Cusk uncovers the mystery of a foreign language, the perils and pleasures of unbelonging, and the startling thrill of discovery -- at once historic and intimate. Both sharp and humane in its exploration of the desire to travel and to escape, of art and its inspirations, of beauty and ugliness, and of the challenge of balancing domestic life with creativity, The Last Supper is an astonishing memoir.

An introductory textbook on the differential geometry of curves and surfaces in 3-dimensional Euclidean space, presented in its simplest, most essential form. With problems and solutions. Includes 99 illustrations.

This handbook provides a comprehensive survey of what is now known about psychological development, from birth to biological maturity, and it highlights how cultural, social, cognitive, neural, and molecular processes work together to yield human behavior and changes in human behavior.

Responding to an explosion of new mathematical and computational models used in the fields of cognitive science, this book provides simple tutorials concerning the development and testing of such models. The authors focus on a few key models, with a primary goal of equipping readers with the fundamental principles, methods, and tools necessary for evaluating and testing any type of model encountered in the field of cognitive science.

The Neuroscience of Cocaine: Mechanisms and Treatment explores the complex effects of this drug, addressing the neurobiology behind cocaine use and the psychosocial and behavioral factors that impact cocaine use and abuse. This book provides researchers with an up-to-date understanding of the mechanisms behind cocaine use, and aids them in deriving new pharmacological compounds and therapeutic regimens to treat dependency and withdrawal symptoms. Cocaine is one of the most highly abused illicit drugs worldwide and is frequently associated with other forms of drug addiction and misuse, but researchers are still struggling to understand cocaine's neuropharmacological profile and the mechanisms of its effects and manifestations at the cognitive level. Cessation of cocaine use can lead to numerous adverse withdrawal conditions, from the cellular and molecular level to the behavioral level of the individual user. Written by worldwide experts in cocaine addiction, this book assists neuroscientists and other addiction researchers in unraveling the many complex facets of cocaine use and abuse. Contains in each chapter an abstract, key facts, mini dictionary of terms, and summary points to aid in understanding Illustrated in full color Provides unique full coverage of all aspects of cocaine and its related pathology Provides researchers with an up-to-date understanding of the mechanisms behind cocaine use, and aids them in deriving new pharmacological compounds and therapeutic regimens to treat dependency and withdrawal symptoms

In 2000, the "Western Development" plan of the Chinese Mainland attracted attention of educators and policy makers. Around that period, the Chinese government also launched large scale and systemic curriculum reforms in basic education and secondary education in achieving quality education across the vast country. Despite significant progress that has been made in educational investments and attainments in China, issues of quality and regional disparities across China remain, especially in the less developed, western part of China where the significance of ethnic diversity, urban-rural disparity and variations in school development exists. In addition, there have been entrenched problems of teacher and teaching quality, resources inadequacy and 'left-behind' children. Written by a group of Chinese and international scholars, the book provides an updated analysis and discussion of educational development and related issues in the less developed part of Western China. These chapters cover broad contextual issues of educational development and reforms, issues of quality and equality in different sectors of education, as well as curriculum implementation, teaching innovations and professional development of teachers.
