The Distant Early Warning Line, also known as the DEW Line or Early Warning Line, was a system of radar stations in the far northern Arctic region of Canada, with additional stations along the North Coast and Aleutian Islands of Alaska, in addition to the Faroe Islands, Greenland, and Iceland. It was set up to detect incoming Soviet bombers during the Cold War, and provide early warning of any sea-and-land invasion. The DEW Line was the northernmost and most capable of three radar lines in Canada.

Because redemption is a place... All they need to do is find the right co-ordinates. Canada is in crisis. Global warming has taken hold, and amid the flooding and the super storms, another horror has risen, more devastating than the rest. The dead begin rising from the ground at night, screaming out strange gibberish songs that terrify and entrance anyone who hears them. With people dying and fleeing all around, the north quickly becomes a wild west, without the west. Felicia "Denny" Dennigan lives far from the crisis, with a good job at the university and a roof over her head, but her life is far from perfect. A perpetual loner, she relies on sporadic visits from her Dad as her only lifeline to friends or family. So, when Dad doesn't return one fall day, and his dog, Geoff,

shows up without him, Denny is concerned for his safety. The last postcard he sent her was from Sudbury, on the edge of the chaos up North... Denny's worst fears are confirmed when she sees Dad on TV, dead, and screaming. Desperate to end his suffering, Denny gives up her job, buys supplies, and heads out with Geoff to discover the truth behind her father's death, but truth always comes with a cost. What Denny discovers in the wilds of Northern Ontario will shatter all of her assumptions about her life, and what lies beyond.

During a government career that spanned nearly the whole of the Cold War, George R. Lindsey gained a reputation as a leading defence scientist and military strategist for Canada's Defence Research Board. His research and writing played a vital role in shaping Canadian policy in air

defence, anti-submarine warfare, the militarization of space, and other areas of crucial concern in the nuclear age. The Selected Works of George R. Lindsey provides full access to a wealth of previously classified historical material regarding the scientific and technical aspects of Canadian defence and national security in the Cold War. Insightful and eye-opening, Lindsey's writings shed light not only on one of Canada's most influential civil servants of the Cold War era, but on the strategies, priorities, and inner workings of the Canadian defence establishment during an active and politically volatile period in world affairs.

Marshall McLuhan (1911–1980) is best

known as a media theorist—many consider him the founder of media studies—but he was also an important theorist of art.

Though a near-household name for decades due to magazine interviews and TV specials, McLuhan remains an underappreciated yet fascinating figure in art history. His connections with the art of his own time were largely unexplored, until now. In *Distant Early Warning*, art historian Alex Kitnick delves into these rich connections and argues both that McLuhan was influenced by art and artists and, more surprisingly, that McLuhan's work directly influenced the art and artists of his time. Kitnick builds the story of McLuhan's entanglement with artists by carefully drawing out the connections among McLuhan, his theories, and the artists themselves. The story is packed with big names: Marcel Duchamp, Niki de Saint Phalle, Jasper Johns, Andy Warhol,

Nam June Paik, and others. Kitnick masterfully weaves this history with McLuhan's own words and his provocative ideas about what art is and what artists should do, revealing McLuhan's influence on the avant-garde through the confluence of art and theory. The illuminating result sheds light on new aspects of McLuhan, showing him not just as a theorist, or an influencer, but as a richly multifaceted figure who, among his many other accolades, affected multiple generations of artists and their works. The book finishes with Kitnick overlaying McLuhan's ethos onto the state of contemporary and post-internet art. This final channeling of McLuhan is a swift and beautiful analysis, with a personal touch, of art's recent transgressions and what its future may hold.

Great Power Competition for Overseas

Bases: The Geopolitics of Access

Diplomacy explores the geopolitics of the major powers' overseas basing systems in relation to global strategies and changes in the international system in three fairly distinct phases: the interwar, early postwar, and recent postwar periods. This book links the great powers' competition for overseas bases to several streams of more or less contemporary international relations theory. This monograph consists of seven chapters and opens with an introduction to the diplomacy of basing access, followed by a discussion on the different types or purposes of basing access as they have evolved over the past several decades in response to changes in diplomacy and military technology. The major powers' overseas basing-access networks in the consecutive interwar, early postwar, and recent postwar periods are then reviewed, along with the earlier

corpus of geopolitical theory, specifically as it relates to basing diplomacy.

Emphasis is on the conflicting assumptions about what reciprocal strategic advantages and disadvantages inhere to the geographic positions of the United States and USSR. The final chapter considers a number of "functional" areas of world politics that are closely intertwined with basing diplomacy, and relates the competition for facilities to raw materials access, surrogate wars, strategic deterrence, arms control, balances of payments, arms sales and aid, alliances, and other such staple concerns of international relations. This book will be of interest to political scientists, military and government officials, diplomats, and policymakers.

power in the United States, Canada once again proved its credentials as a key American ally. With the imminent end of its combat role in Afghanistan, however, it is time to take stock of how Canada has adapted to the exigencies of the post-9/11 world and to consider the future directions for its foreign, defence, and security policies. This timely exploration and re-assessment of Canada's approach to strategic affairs offers a diverse set of nuanced, sometimes controversial, and always insightful perspectives on the most pressing security challenges that Canada currently faces. Bringing together noted experts on these issues – including a Canadian Senator, a past Minister of National Defence, former high-level military officers, and top scholars - this collection provides powerful ideas and guidance for the difficult task of formulating an overarching national
