English to examine the features of legal discourse in both languages and uncover the different translation techniques used. In so doing, it addresses the following questions: What are the features of English and Arabic legal texts? What are the similarities and differences of English and Arabic legal texts? What are the difficult areas of legal translation between English and Arabic legal texts? What are the techniques for translating these difficult areas on the lexical and syntactic levels? Features include: A thorough description of the features

wide selection of authentic legal documents, reinforced by practical discussion points, exercises and practice drills to encourage active engagement with the material and opportunities for hands-on learning. Wide-ranging, scholarly and thought-provoking, this will be a valuable resource for advanced undergraduates and postgraduates on Arabic, Translation Studies and Comparative Linguistics courses. It will also be essential reading for translation professionals and researchers working in the field.

Legal language differs from

ordinary language, not just in vocabulary, but also in its morphology, syntax, semantics and other linguistic features. This book explores the differences in such features, in addition to investigating the description, development, distinctive features, characteristics, difficulties and problems of drafting legal English and Arabic texts within their respective legal contexts. Particular attention is given throughout to the characteristic features of legal language that usually tend to be ignored in academic analysis. As such,

the book will be of interest to both lawyers and linguists, and will help foster a greater understanding of the features of legal language and how inaccuracies can be avoided.

Studies features a selection of papers originally authored for this volume, addressing a variety of issues from different points of view and offering interesting contributions to the critical literature of the field. The volume provides useful resources that will be of great benefit for academics, students and practitioners. The contributions to this book promote research on translation theory and practice, and suggest ways of dealing with translation problems. The volume chapters are written by researchers from around the world, and consider various

different languages and contexts. Areas of investigation include contrastive linguistics and translation, corpus-based translation studies, natural language processing, machine translation, and translator training.

This book is about trials, civil and criminal, ecclesiastical and secular, in England and Europe between the 13th and the 17th centuries.

For a “smart”, sensible translation , you should forget not the knowledge acquired at school or university, but the

corrective standards. Some people want a translation with the touch of the source version, while another people feel that in a successful version we should not be able to guess the original language. We have to realize that both people have right and wrong, and that their only fault is to present requirement as an absolute truth. Teachers agree at least on this principle: "If a sentence is ambiguous, the translation must also be". There is another critical, less easy to argue, based on an Italian phrase with particularly strong wording: "Traduttore, traditore".

This critique argues that any translation will betray the author's language, spirit, style ... because of the choices on all sides. What to sacrifice, clarity or brevity, if the formula in the text is brief and effective, but impossible to translate into so few words with the exact meaning? One could understand this criticism that it encourages us to read "in the text." It seems obvious that it is impossible to follow this advice into practice.

This volume provides a comprehensive overview of the research carried out over the past thirty years

in the vast field of legal discourse. The focus is on how such research has been influenced and shaped by developments in corpus linguistics and register analysis, and by the emergence from the mid 1990s of historical pragmatics as a branch of pragmatics concerned with the scrutiny of historical texts in their context of writing. The five chapters in Part I (together with the introductory chapter) offer a wide spectrum of the latest approaches to the synchronic analysis of cross-genre and cross-linguistic variation in legal discourse. Part II addresses diachronic

variation, illustrating how a diversity of methods, such as multi-dimensional analysis, move analysis, collocation analysis, and Darwinian models of language evolution can uncover new understandings of diachronic linguistic phenomena.

This volume presents a comprehensive and up-to-date overview of major developments in the study of how phraseology is used in a wide range of different legal and institutional contexts. This recent interest has been mainly sparked by the development of corpus linguistics research, which has both

demonstrated the centrality of phraseological patterns in language and provided researchers with new and powerful analytical tools. However, there have been relatively few empirical studies of word combinations in the domain of law and in the many different contexts where legal discourse is used. This book seeks to address this gap by presenting some of the latest developments in the study of this linguistic phenomenon from corpus-based and interdisciplinary perspectives. The volume draws on current research in legal phraseology from a variety of perspectives:

translation, comparative/contrastive studies, terminology, lexicography, discourse analysis and forensic linguistics. It contains contributions from leading experts in the field, focusing on a wide range of issues amply illustrated through in-depth corpus-informed analyses and case studies. Most contributions to this book are multilingual, featuring different legal systems and legal languages. The volume will be a valuable resource for linguists interested in phraseology as well as lawyers and legal scholars, translators, lexicographers,
