“David Foster Wallace meets Gabriel Garcia Marquez” in this novel set in a dystopian Los Angeles from a National Book Award finalist (Publishers Weekly). Irreverently juggling magical realism, film noir, hip hop, and chicanismo, Tropic of Orange takes place in a Los Angeles where the homeless, gangsters, infant organ entrepreneurs, and Hollywood collide on a stretch of the Harbor Freeway. Hemmed in by wildfires, it’s a symphony conducted from an overpass, grandiose, comic, and as diverse as the city itself—from an author who has received the California Book Award and the Association for Asian American Studies Book Award, among other literary honors. “Fiercely satirical . . . Yamashita presents [an] intricate plot with mordant wit.” —The New York Times Book Review “A stunner . . . An exquisite mystery novel. But this is a novel of dystopia and apocalypse; the mystery concerns the tragic flaws of human nature.” —Library Journal (starred review) “Brilliant . . . An ingenious interpretation of social woes.” —Booklist (starred review)

In Alien Capital lyko Day retheorizes the history and logic of settler colonialism by examining its intersection with capitalism and the racialization of Asian immigrants to Canada and the United States. Day explores how the historical alignment of Asian bodies and labor with capital's abstract and negative dimensions became one of settler colonialism's foundational and defining features. This alignment allowed white settlers to gloss over and expunge their complicity with capitalist exploitation from their collective memory. Day reveals this process through an analysis of a diverse body of Asian North American literature and visual culture, including depictions of Chinese railroad labor in the 1880s, filmic and literary responses to Japanese internment in the 1940s, and more recent examinations of the relations between free trade, national borders, and migrant labor. In highlighting these artists' reworking and exposing of the economic modalities of Asian racialized labor, Day pushes beyond existing approaches to settler colonialism as a Native/settler binary to formulate it as a dynamic triangulation of Native, settler, and alien populations and positionalities.

This volume of Advances in Intelligent and Soft Computing contains accepted papers presented at SOCO 2011 held in the beautiful and historic city of Salamanca, Spain, April 2011. This volume presents the papers accepted for the 2011 edition, both for the main event and the Special Sessions. SOCO 2011 Special Sessions are a very useful tool in order to complement the regular program with new or emerging topics of particular interest to the participating community. Four special sessions were organized related to relevant topics as: Optimization and Control in Industry, Speech Processing and Soft Computing, Systems, Man & Cybernetics and Soft Computing for Medical Applications.

This book constitutes the refereed proceedings of the 13th International Conference on Advanced Concepts for Intelligent Vision Systems, ACIVS 2011, held in Ghent, Belgium, in August 2011. The 66 revised full papers presented were carefully reviewed and selected from 124 submissions. The papers are organized in topical sections on classification recognition, and tracking, segmentation, images analysis, image processing, video surveillance and biometrics, algorithms and optimization; and 3D, depth and scene understanding.
