Review and retain the information you need for success on the boards with Nelson Pediatrics Board Review: Certification and Recertification. This highly practical review tool follows the American Board of Pediatrics (ABP) general pediatrics content outline, with topics weighted to correlate with the exam. Must-know information is presented in a way that's easy to study and remember, and is backed by the Nelson family of references that you know and trust for current, authoritative information in your field. Equips residents and physicians with an efficient, comprehensive system for study, designed specifically to help you perform at your best on the board exam. Presents information in a bulleted, high-yield format, with topics matching ABP content guidelines. Provides a real-world balance of necessary fundamental information and cutting-edge advances - all carefully written and reviewed by editors and contributors from the world renowned Children's Hospital of Philadelphia (CHOP). Features over 600 board-style questions with full, discursive answers online. Includes reader-friendly features that promote testing success: tables that show differences between diagnoses, genetic disorders grouped by key features in phenotypic presentation rather than in alphabetical order, and more - all designed to help you recall key information when taking exams. Provides online links to the Nelson Textbook of Pediatrics that offer a complete presentation of the content, including evidence-based treatment and management.

Regarded as the "go-to" book for those seeking certification and recertification in nephrology with the American Board of Internal Medicine, Nephrology and Hypertension Board Review prepares you for success on the nephrology board exam. The fully updated second edition proportionally covers all topics listed in the blueprint for the exam, using a concise outline format, numerous illustrations, and many new features that promote high-yield studying and effective retention of complex material. Board-type questions in every chapter provide ample opportunity to practice and help you identify areas for further study.

Review Guides/Certification Prep/Pocket Guides

This clinical casebook provides a comprehensive yet concise state-of-the-art review of adult critical care medicine. Presented in a case-based format, each case focuses on a scenario commonly encountered with an adult patient in the ICU. Case scenarios include management of seizures and acute intracranial hypertension, sepsis, liver failure, brain death, bleeding and thrombosis, and treating hospital acquired infections in the ICU. Written by experts in the field, Adult Critical Care Medicine: A Clinical Casebook is a valuable resource for critical care specialists and practitioners who treat adult patients in critical care settings.

Pediatrics Board Review (PBR) was written by Dr. Ashish Goyal to help pediatricians pass the American Board of Pediatrics Initial Certification exam, the MOC recertification exam & the MOCA-Peds exam. The PBR offers a 100% money-back first-time pass guarantee & has had multiple consecutive years of 100% Pass Rates for the MOC exam. PBR has also achieved seemingly unattainable results, such as helping pediatricians finally pass their initial certification exam after up to SEVEN previous failed attempts. PBR's Core Study Guide is now available on mobile devices (e.g., iPhone) and tablets (e.g., iPad). _____ Testimonials: <http://www.pediatricsboardreview.com/testimonials> _____ Pass Guarantee & Return Policy: <http://www.pediatricsboardreview.com/guarantee> _____ BUNDLES (PRODUCTS INCLUDING THIS ONE AT A DISCOUNT PRICE): <http://www.pediatricsboardreview.com/catalog> _____ DISCOUNTED PEDIATRIC BOARD REVIEW QUESTIONS: <http://www.pediatricsboardreview.com/tools>

Covers the most frequently asked and tested points on the pediatric board exam. Each chapter offers a quick review of specific diseases and conditions clinicians need to know during the patient encounter. Easy-to-use and comprehensive, clinicians will find this guide to be the ideal final resource needed before taking the pediatric board exam.

1ST FLAP COPY Several years ago, while I was rounding at one of the Brigham and Women's Hospital nurseries, a new father shared a funny story with me. Early the previous morning, this new father went to the hospital lobby in search of coffee and bagels. While waiting in line at the coffee shop, the father noticed a man enter the lobby. He was struck by the odd appearance of this man. In the midst of a brutally cold New England winter, this man was dressed in a bicycle racing shirt, shorts, ski socks pulled up to his knobby knees, ankle weights, a hos-pital ID badge around his neck, and a propeller attached to the top of his bicycle helmet. When he returned to his wife's hospital room, he told her about his experience. This new dad worked in the human services field and was very impressed that the hospital was so progressive as to hire such an obviously mentally challenged person. About ten minutes passed when the new parents heard a loud knock on the hospital room door. To their surprise, shock, astonishment and horror, the same man walked into the room-complete with the propeller helmet, shorts, ski socks, ankle weights. Now the man had a stethoscope around his neck and was pushing a portable crib with their new baby! Greeting the shocked and befuddled new parents, the man proudly announced his arrival. "Hi, I'm Dr. Heller. I'm your pediatrician and am here to exam-ine your baby." Dr. Dan was, without a doubt, the most unique, charismatic and outgoing individual who one will ever meet. As one mother remarked to me, "You will always remember the first time you met Dr. Dan." Bruce Bunnell, MD, Dr. Heller's partner of 15 years at Centre Pediatrics, told this story at a memorial service for Dr. Heller in 2005. 2nd FLAP: "Having Dr. Heller for a doctor was like having Mary Poppins for a nanny." -Parent, Sara B. "Dr. Dan was an original-that's the only way I know how to put it. He is such a huge part of our family history that memories keep flooding in. For example, when our daughter finally slept through the night after months of disturbing our sleep, my husband and I were not only shocked: as new parents, we were also worried that her brand new sleep pattern might signal a serious medical problem. Dr. Dan was on when I called, and I will never forget how he questioned me closely about symptoms and listened very carefully to all I said. Then, as I hung on to every word of diagnosis he could provide for me, he slowly explained, 'That, Mrs. L, is what we in the medical profession refer to as ...a blessing!'" -Parent, Susan L.

The optimal management of children who receive dialysis therapy requires a thorough understanding of the multidisciplinary nature of their treatment. The multiple organ systems that are often impacted by acute and chronic impairment of kidney function makes the care of this patient population highly complex. This 3rd edition of Pediatric Dialysis provides authoritative and comprehensive information on all aspects of dialysis-related care for children to assist the clinician in achieving the best possible patient outcomes. Like the two preceding editions, the 3rd edition enlists experts from North America, South America, Europe, and Asia to provide their perspectives on virtually all issues pertaining to dialysis-related management for children, based on years of clinical and research experience. The book contains sections on all essential topics including when to initiate dialysis, peritoneal dialysis, hemodialysis, managing secondary complications, nutritional therapy, drugs and dialysis, dialysis outcomes, and transition to adult care. Each chapter has been thoroughly updated in terms of content and references. The book also includes several new chapters on topics such as remote patient monitoring, acute kidney injury management in the developing world, and antibiotic stewardship in the dialysis unit, maintaining the text's preeminent status as a worldwide source for pediatric dialysis care.
