~~OPERATOR'S MANUAL~~

The hydraulic operating piston of the annular BOP is designed to efficiently actuate the piston, thereby closing the packer and minimizing the effect that well pressure has on the pack-off. The normal 1,500-psi hydraulic pressure is the maximum required for BOP operation over the full 10,000-psi working pressure range.

The Annular BOP is a different type of safety unit used to control wellbore fluids. This type of BOP consists of a large rubber sealing element which is mechanically squeezed inward to seal on tubulars or the open hole. The ability to seal on a variety of pipe sizes is one advantage the annular blowout preventer has over ram-type blowout preventers. Shaffer Spherical BOPs seal onto almost any ...

~~Shaffer Spherical Annular Manual~~

Cameron DL high-pressure annular BOPs allow reliable performance in a shorter height and lighter weight than comparable annular BOPs. The unique design of our DL BOP does not require wellbore assist. The annular can close on drillpipe or large tubulars without reducing operating pressure, which minimizes risk of indentation or damage to casing.
