Richard Lafargue is an eminent plastic surgeon haunted by dirty secrets. He has an operating theatre in the basement of his chateau and keeps his partner Eve imprisoned in her bedroom, a room he has equipped with an intercom and 300-watt speakers through which he bellows orders. Eve is only allowed out to be paraded at cocktail parties and on the last Sunday of each month, when the couple visit a young woman in a mental asylum. Following these outings, Lafargue humiliates Eve by forcing her to perform lewd sexual acts with strangers while he watches through a one-way mirror. In alternating chapters, Jonquet introduces seemingly unrelated characters - a criminal on the run after murdering a policeman, and an abducted young man who finds himself chained naked in a dark chamber, forced to endure all manner of physical torture at the hands of a mysterious stranger, whom he calls Mygale, after a type of tropical spider. All of these characters are caught in a deceitful web, waiting to meet their fate.

WINNER OF THE NOBEL PRIZE IN LITERATURE Music legend Bob Dylan's only work of fiction—a combination of stream of consciousness prose, lyrics, and poetry that gives fans insight into one of the most influential singer-songwriters of our time. Written in 1966, *Tarantula* is a collection of poems and prose that evokes the turbulence of the times in which it was written, and offers unique insight into Dylan's creative evolution, capturing the stream-of-consciousness preoccupations of the legendary folk poet and his eclectic, erudite cool at a crucial juncture in his artistic development. It has since been welcomed into the Dylan canon, as Dylan himself has cemented his place in the cultural imagination, inspiring Todd Haynes's acclaimed 2007 musical drama *I'm Not There*, selling more than 100 million

records, and winning numerous prizes, including the Nobel Prize for Literature in 2017. In his acceptance speech for the Nobel, Dylan acknowledged the early influence on his work of Buddy Holly and Lead Belly as well as of wide-ranging classics like Don Quixote, All Quiet on the Western Front, and Moby Dick. Tarantula is a rare chance to see Dylan at a moment in which he was still deeply connected to his country roots and a folk vernacular while opening himself up to the influence of French 19th-century Surrealist writers like Arthur Rimbaud and the Comte de Lautreamont. A decade before the confessional singer-songwriter who would create the 1975 epic, Blood on the Tracks—which was just optioned by filmmaker Luca Guadagnino—here is Dylan at his most verbally playful and radically inventive. Angry, funny, and strange, the poems and prose in this collection reflect the concerns found in Dylan's most seminal music—a spirit of protest, a poetic spontaneity, and a chronicling of the eccentric and the everyday—which continue to make him a beloved artist and cultural icon.
