Coaching can be a powerful way of developing your interpersonal skills, raising your awareness of how you interact with others whether it is with friends, family, other social relationships or those you interact with at work. You may seek coaching because you face challenges with certain relationships you have in your life, and wish to take the opportunity to examine the part you play and take responsibility for making changes yourself in order to enhance the relationship.

5 Interpersonal Skills ALL Effective Managers Need. When new managers are appointed, employers often evaluate their technical skills or industry-related experience before hiring them. However, managers need other valuable skills to effectively lead teams to do their jobs, as well. Interpersonal skills are on top of this list, as a good leader needs to be able to communicate with, motivate and discipline employees.

Team Coaching is a process which is underpinned by a set of competencies and skills rather than a leadership approach or style. This does not mean that personality and style are not important. Your unique personal style will, of course, influence the way each competency or skill is applied or expressed. A set of team coaching competencies and/or skills is outlined below along with a short description of each.
